SUMMARY

Flutter Developer with 2 years of experience in mobile application development, API integration, Cubit state management and UI/UX best practices, including freelance apps built for corporate and health events. Computer Science graduate (GPA 3.58, Excellent with Honors) who has also taught programming, AI and app development to 200+ students. Eager to contribute innovative ideas, write maintainable code and grow within a dynamic development team.

EXPERIENCE

Freelance Flutter Developer | Freelance 02/2026 – Present

- Built the Smart Competitions Platform for Knauf: a live quiz app for a company event with a waiting room, timed questions, a leaderboard and an admin panel for the host.
- Built a medical game used at a medical event to show how a product affects each part of the body.
- Built a health-event app that collects steps from many people on Android (Health Connect) and iPhone (HealthKit), and shows each user their last 7 days of steps.
- Screens and details of these projects are in my portfolio.

Programming Instructor | iSchool (Remote) 07/2026 – 10/2026

- Delivered 145 sessions to 200+ students aged 6 to 18, teaching AI, mobile app development, game creation with Unity, Python and cybersecurity basics through hands-on labs.
- Guided students in building practical projects, including mobile apps, Unity games and Python programs, using PictoBlox, mBlock, FlutterFlow and Unity.
- Supported students with debugging and troubleshooting, and evaluated progress with constructive, personalized feedback.

Flutter Development Intern | Huma-volve (Remote) 10/2025 – 11/2025

- Built and maintained responsive UI layouts using Flutter, focusing on usability, performance and visual consistency across devices.
- Integrated RESTful APIs and handled real-time data updates using state management solutions such as Bloc and Provider.
- Contributed to code reviews and followed clean architecture principles to maintain code quality and readability.

EDUCATION

Faculty of Computers and Information, Computer Science Department 09/2021 – 2025

Menoufia University | GPA 3.58 (Excellent with Honors) | Graduation project Bridgeit: A+

SKILLS

- **Programming Languages:** Dart, Java, Python, C#, C++
- **Mobile Development:** Flutter, Android, iOS, Health Connect, HealthKit
- **Architecture & Patterns:** MVVM, Clean Architecture, SOLID Principles
- **State Management:** Bloc, Cubit, Provider, GetX
- **Backend & Networking:** Firebase, APIs, RESTful, Push Notifications
- **Local Databases:** Hive, SQLite, Shared Preferences
- **Mapping Services:** Google Maps, OpenStreetMap
- **Design Tools:** UI/UX Design using Figma, Adobe Photoshop, Adobe Illustrator
- **Version Control:** Git, GitHub
- **Tools & Labs:** VS Code, PyCharm, Unity, Godot, Google Colab, Jupyter Notebook, Burp Suite, VirtualBox
- **Office & Other:** Microsoft Word, Excel, PowerPoint; debugging, object-oriented programming (OOP)

PROJECTS

Bridgeit (Graduation Project, A+) | Demo

Flutter mobile app that helps final-year students document their graduation projects. Teams and doctors share a workspace with university templates, task tracking and a log of challenges and solutions; AI compiles everything into an editable Word documentation. Built the mobile app as one of two mobile developers in a team of 9.

Tech: Flutter, Cubit, REST API, AI integration

Hungry? (Food Delivery App) | GitHub

Food delivery app for ordering burgers. Users browse the menu by category, search for food, customize a burger with toppings and spice level, manage the cart, pay by cash on delivery or card, and reorder from their order history.

Tech: Flutter, Cubit, Clean Architecture, RESTful API

Quizzy (Quizzes App) | GitHub | Demo

Dynamic quiz app covering multiple subjects, with score tracking and review of correct and incorrect answers.

Tech: Flutter, GetX, Firebase

Friend Circle (Social Media App) | GitHub | Demo

Social media app for sharing posts and stories, connecting with friends and browsing content.

Tech: Flutter, Cubit, Firebase

Halaqa Qurania (Islamic App) | GitHub

Islamic app providing prayer times, Azkar, Dua, Quran and Hadith in one place.

Tech: Flutter, Firebase, Cubit, API integration

Vocabs Note App | GitHub | Demo

To-do style app that helps users study and organize English and Arabic vocabulary.

Tech: Flutter, Hive

VOLUNTEERING

Graphic Designer, Multimedia Team, ICPC Menoufia Chapter (04/2022 – 06/2025): created posts and promotional banners for community activities, events and training programs.

CERTIFICATES

- Artificial Intelligence (Summer Training), NTI, May 2025
- Solid Principles, Udemy, Aug 2025
- Flutter Development, Mentor Academy, June 2024
- UI/UX Development (Summer Training), ITI, September 2023
- ICDL Training, Apple4 Academy, April 2022
- Human Development / Entrepreneurship, Canadian Training Center of Human Development, Feb 2022

LANGUAGES

Arabic: Native | **English:** Professional working proficiency
