SUMMARY

Computer Science graduate (GPA 3.58, Excellent with Honors) and Programming Instructor who has delivered 145 sessions to 200+ students aged 6 to 18, teaching AI, mobile app development, game creation with Unity, Python and cybersecurity basics through hands-on projects and labs. Strong foundation in Dart, Python, Java and object-oriented programming, with a passion for explaining technical concepts clearly, supporting students through debugging, and giving constructive feedback that helps them grow.

EDUCATION

Faculty of Computers and Information, Computer Science Department 09/2021 – 2025

Menoufia University | GPA 3.58 (Excellent with Honors)

Graduation Project: Bridgeit (Grade: A+) | Flutter, Cubit, REST API, AI integration

- Platform that simplifies documenting graduation projects for final-year students: each team and its supervising doctors share a workspace, with documentation templates for different universities and departments.
- Teams log each step of their work, organize tasks by status (ongoing, finished) so members can follow each other's progress, and record the challenges they faced and how they solved them.
- At the end of the project, AI compiles all recorded information into a complete documentation that can be downloaded as an editable Word file.
- Developed the Flutter mobile app as one of two mobile developers in a cross-functional team of 9 (UI/UX, web frontend, mobile, and AI), collaborating closely with the other teams.

TEACHING EXPERIENCE

Programming Instructor | iSchool (Remote) 07/2026 – 10/2026

- Delivered 145 interactive, hands-on programming sessions to 200+ students aged 6 to 18, adapting explanations to each learner's age, level and pace.
- Taught AI, mobile app development, game creation with Unity, Python programming, and cybersecurity basics through hands-on labs.
- Taught core programming concepts (variables, conditions, loops, functions) and problem-solving skills.
- Guided students in building practical projects, including mobile apps, Unity games and Python programs, using PictoBlox, mBlock, FlutterFlow and Unity.
- Supported students with debugging and troubleshooting, helping them apply concepts to real projects.
- Evaluated student progress and provided constructive feedback and personalized guidance to strengthen technical and problem-solving skills.

PROFESSIONAL EXPERIENCE

Flutter Development Intern | Huma-volve (Remote) 10/2025 – 11/2025

- Built responsive Flutter UI layouts and integrated RESTful APIs using Bloc and Provider for state management.
- Took part in code reviews and followed clean architecture principles, explaining and discussing technical decisions with the team.

SKILLS

- **Programming Languages:** Dart, Python, Java, C#, C++
- **Core Concepts:** Object-oriented programming (OOP), SOLID principles, debugging, clean architecture
- **Subjects Taught:** Artificial intelligence, mobile app development, game creation with Unity, Python, cybersecurity basics (hands-on labs)
- **Teaching & Mentoring:** Lesson delivery, explaining concepts clearly, student support and debugging help, feedback and progress evaluation, project-based learning
- **Educational Tools:** PictoBlox, mBlock, FlutterFlow, Unity, Godot, VS Code, PyCharm, Google Colab, Jupyter Notebook
- **Cybersecurity & Labs:** Cybersecurity basics with hands-on labs, Burp Suite, VirtualBox (virtual machine environments)

- **Development:** Flutter, Android, iOS, Firebase, REST APIs, SQLite, Hive, Git and GitHub
- **Design & Office:** Figma, Adobe Photoshop, Adobe Illustrator; Microsoft Word, Excel, PowerPoint

SELECTED PROJECTS

Quizzy (Quizzes App) | Flutter, GetX, Firebase

Multi-subject quiz app with score tracking and review of correct and incorrect answers.

Vocabs Note App | Flutter, Hive

Study app that helps users organize and learn English and Arabic vocabulary.

VOLUNTEERING

Graphic Designer, Multimedia Team, ICPC Menoufia Chapter (04/2022 – 06/2025): designed posts and banners promoting community events and training programs.

TRAINING & CERTIFICATES

- Artificial Intelligence (Summer Training), NTI, May 2025
- Solid Principles, Udemy, Aug 2025
- Flutter Development, Mentor Academy, June 2024
- UI/UX Development (Summer Training), ITI, September 2023
- ICDL Training, Apple4 Academy, April 2022
- Human Development / Entrepreneurship, Canadian Training Center of Human Development, Feb 2022

LANGUAGES

Arabic: Native | **English:** Professional working proficiency
